PROFESSIONAL SUMMARY

Computer Applications postgraduate (CGPA 8.33/10) with hands-on experience designing and building full-stack JavaScript products using React.js, Node.js, Express.js, and MongoDB. Skilled in REST API design, JWT-based authentication, and integrating large language model tools such as LangChain into functional, real-world software. Strong foundation in data structures, OOP, and database design, with a track record of independently taking projects from schema design to a deployed, responsive UI.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL

Frontend Development: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend Development: Node.js, Express.js, REST API Design, JWT Authentication, Bcrypt

Databases: MongoDB, Mongoose, MySQL

AI / LLM Integration: LangChain, Tavily API, Prompt Engineering, Third-Party API Integration

Tools & Practices: Git, GitHub, Postman, VS Code, Agile/Scrum Basics, Zod (Validation)

Core CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

AI-Powered Web Search & Email Assistant - [GitHub Repository](#)

Tech Stack: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, LangChain, Tavily API, Nodemailer, JWT, Bcrypt, Zod

- Architected a full-stack MERN application that pairs LangChain with the Tavily search API, letting users get current answers to time-sensitive queries instead of relying on static model knowledge.
- Implemented secure authentication and session handling with JWT and Bcrypt, adding email verification through Nodemailer to keep unverified users out of the application.
- Designed an automated email-generation feature that pulls live web results into context, drafts a relevant message, and sends it directly from the platform - cutting out manual research and writing.
- Validated all RESTful endpoints with Zod schemas and centralized error handling, so malformed requests fail predictably instead of crashing the server.
- Handled complex asynchronous state with Redux Toolkit, keeping the interface responsive while multiple API calls resolved in the background.

ACHIEVEMENTS

NASA Space Apps Challenge - Hackathon Participant

- Collaborated in a 4–5-member cross-functional team to design an environmental solution powered by Earth satellite data and geospatial analysis, identifying optimal locations for tree plantation.
- Built a prototype recommendation engine that suggests region-specific plant species from geographic and environmental data, aimed at improving survival rates and supporting sustainable urban development.

EDUCATION

IMS Unison University - Dehradun, Uttarakhand, India 2025 – 2027 (Pursuing)
Master of Computer Applications (MCA) | Current CGPA: 8.33 / 10.0

HNB Garhwal University - Srinagar, Uttarakhand, India 2022 – 2025
Bachelor of Science in Information Technology (BSc-IT) | CGPA: 6.66 / 10.0

LEADERSHIP & INVOLVEMENT

Training & Placement (T&P) Coordinator - School of Computer Applications, IMS Unison University

- Coordinated campus recruitment activities, placement drives, and technical workshops for department students.

Core Member, Discipline Committee - IMS Unison University

- Helped maintain event logistics and order across university-wide programs and inter-university events (Lamhe).

LANGUAGES

English (Professional Working Proficiency), Hindi (Native)
